SUMMARY

QA Engineer and AI Specialist focused on product creation and software reliability. I have a full-stack technical profile that I leverage through the advanced use of LLMs and agentic tools. I specialize in leading automation in dynamic environments, compensating for resource limitations through innovative architectures and optimizing value delivery with full technical autonomy.

EXPERIENCE

OneVisa - Dubai (UAE) / Spain, (Part-time) Senior Principal QA Engineer (AI & Reliability)

Feb 2026 – Aug 2026

7 months

- Sole QA lead in a high-growth startup, designing and executing the end-to-end testing and reliability architecture from scratch.
- Architected, deployed, and delivered a fully functional autonomous QA Agent (orchestrated with Claude Code, custom skills, and hooks) capable of end-to-end testing across the entire company and sustaining continuous product evolution.
- Implementation of iterative self-diagnostic pipelines and DORA QA telemetry, drastically reducing debugging cycles and scaling test coverage across multiple squads with minimal headcount.

Tata Consultancy Service - Banco Galicia, SSR QA Automation Engineer

Apr 2023 – present

3 years 6 months

- Test automation technical leadership within the Tools & Data Tribe (since Jul 2026): end-to-end Web and API automation using Tricentis Tosca, and architectural design of 'KrakenQA'—a modular agentic testing framework built in VS Code to embed multi-stack runners (Mobile, Web, API), strategically implemented for Android and iOS mobile app automation to overcome the steep operational friction of Tosca Mobile.
- Sustained professional progression and promotion to SSR: transitioned from Onboarding to Retail Transfers ('Transferencias Minoristas'), spearheading quality assurance and technical testing for the core mobile banking app under high-volume transaction environments.
- Co-creation and architectural design of proprietary QA AI agents ('CobroTron' & 'FullTron/Multi-crafterQA'): pioneered the filtered-DOM auto-debug pattern for autonomous test iteration, POM framework generation (Playwright, Python, Appium), and seamless ALM metrics and evidence reporting.
- Agile testing governance, distributed trace/log telemetry analysis, and optimization of testing infrastructure and SQL/NoSQL queries in close alignment with core engineering teams.

Ada School - Colombia, Python Instructor (Data & FullStack BootCamp)

Sept 2023 – Oct 2024

1 year 2 months

- Advanced technical mentorship in Python focused on code quality, software architecture, and development best practices for international profiles.

EDUCATION

National University of Hurlingham

Jan 2024 – present

University Technician in Artificial Intelligence

Teacher Training Institute N°109

Mar 2019 – Dec 2023

Secondary Education Professor in Economics and Management

- Last year pending

SKILLS

AI & Agents: Claude Code, Gemini, DeepSeek, GitHub Copilot, Cursor, Antigravity, Engram, Prompt Engineering, OpenAI, Anthropic, Scikit-learn, Pandas, NumPy

Testing & QA: Tricentis Tosca, Playwright, Cypress, Selenium, Appium, Pytest, k6 (Performance), Postman, Bruno

Dev & Ops: Python, TypeScript, JavaScript, Java, Node.js, FastAPI, Flask, AWS, Docker, Jenkins, Linux, Bash, CI/CD

Observability & Data: Grafana, Kibana, SQL, NoSQL, Matplotlib, Seaborn, Trace/Log Analysis, GitHub Actions

Languages: Spanish, English

PROJECTS

Zenco.arg (In Prod)

- React 18
- Node.js
- AI WhatsApp Bot
- Gemini AI

El Industrial (In Prod)

- Python
- Vanilla JS
- API REST
- Telegram Bot
- IA Reporting

Portfolio CV (Live)

- JSON Resume
- Astro
- RenderCV (ATS Friendly)
- i18n
- Advanced Dark Mode
